Stored TRIZOL extracts at -80 °C

↓
TRIZOL extracts were thawed and the aqueous phase discarded completely.

↓
To the organic phase 100% ethanol was added to precipitate the DNA

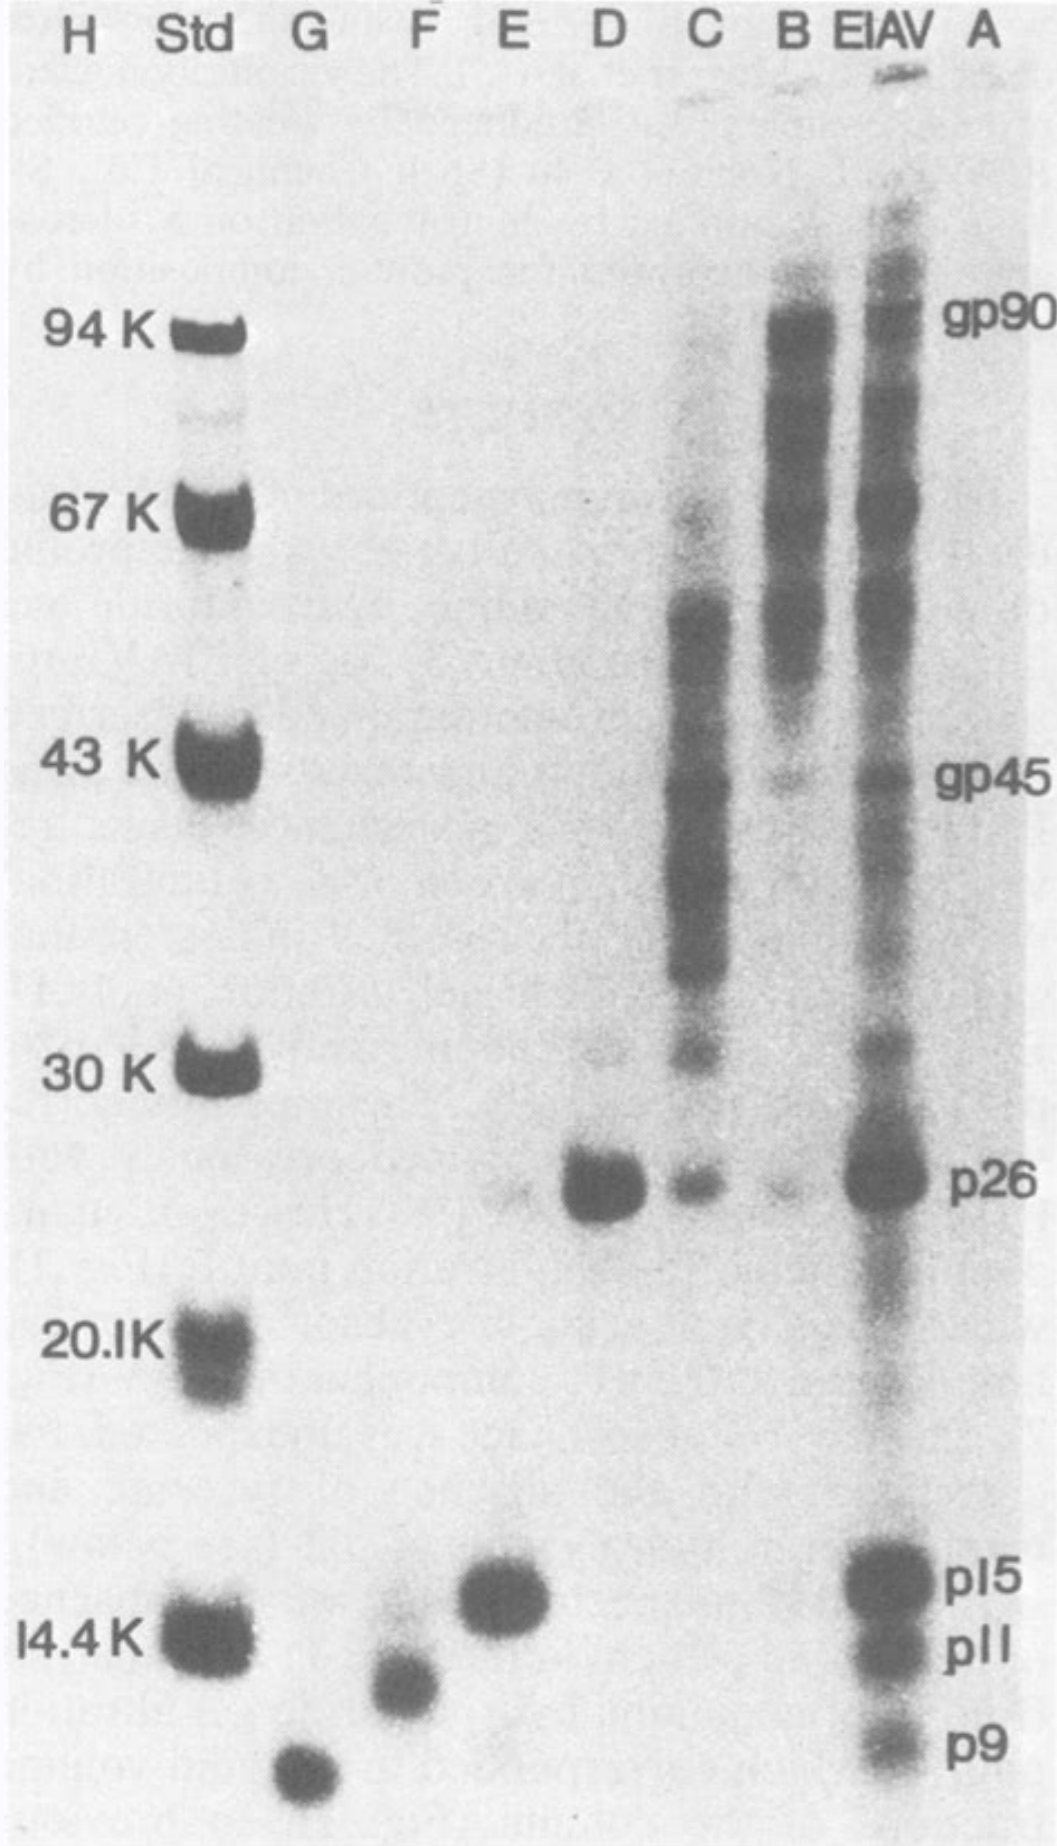

↓
Isopropanol was added to the supernatant to precipitate the protein.

↓
Protein precipitate was washed with 0.3 M guanidine hydrochloride in 95% ethanol.

↓
The protein precipitate was dissolved in 1% SDS.

↓
To ensure maximum dissolution the precipitate along with the 1% SDS was incubated at 50 °C for 40 minutes with intermittent vortexing.

↓
The clear supernatant was aliquoted for further use.

Hazardous materials must have follow-up of MSDS sheets for workers, management, conveyors and security personnel to stay safe. Protecting workers, the important purpose of an MSDS is to protect the workers' health that they have to use chemical and potentially dangerous work on work. The number CAS is an unique identifier defined by the American Chemical Society and is internationally used. In addition, SDS must be available for local fire departments, local emergency planning operations and state planning employees. Material Safety Data Sheets (MSDS) List Possible Risks Associated with Chemical Products and Other Products, and say that users and security personnel like working with security around these items.
